

Declaration of Carbon Neutrality

Committed action by the global economy is essential to fulfil the promise of the Paris Climate Agreement and limit global warming to 1.5°C or well below 2°C compared to pre-industrial levels. MMM has committed to maintaining carbon neutrality for Scope 1 and Scope 2 from 2024 onwards.

MMM Münchener Medizin Mechanik GmbH is carbon neutral since 2024.*

* MMM offsets all unavoidable Scope 1 and Scope 2 GHG emissions.

Continuous CO₂ reduction. MMM is certified according to ISO 14001 and ISO 50001. For many years, MMM has demonstrated the continuous reduction of its environmental impact and ongoing improvement of its energy performance. Through action plans and investments, MMM has been focussing on renewable energy sources and reducing their consumption for years.

Carbon Footprint. MMM has systematically calculated its greenhouse gas emissions using the GHG Protocol Standard. The GHG Protocol Corporate Accounting and Reporting Standard contains requirements and guidelines for companies wishing to calculate their GHG emissions and covers the accounting and reporting of seven greenhouse gases covered by the Kyoto Protocol. Data is collected annually on the basis of the MMM Recalculation Policy.

Goals. Limiting global warming to 1.5 °C in accordance with the Paris Agreement is one of MMM's sustainability goals. To this end, MMM Münchener Medizin Mechanik GmbH will become climate neutral in Scope 1 and Scope 2 by 2024 and the MMM Group by 2030. In addition to the strategic goals, action plans for the gradual reduction of GHG emissions will be implemented (Carbon Management Plan).

Offsetting. Offsetting unavoidable emissions by supporting recognised climate protection projects is a prerequisite for MMM's climate neutrality. The climate projects fulfil the Gold Standard, i.e. independent organisations approved by the United Nations check the actual CO₂ reduction of the projects of our partner atmosfair.
